Career Objective

Enthusiastic Full Stack Web Developer with a particular interest in front-end development, UI/UX, and modern web technologies. Passionate about building efficient, scalable, and user-centered web applications while continuously strengthening technical expertise across the stack, from responsive interfaces to RESTful backends, using tools like React, Node.js, PostgreSQL, and JWT/OAuth authentication. Looking ahead, aims to grow into a DevOps Engineer by developing skills in CI/CD, containerization, and cloud infrastructure, bridging development and operations. Combines strong full-stack fundamentals with automation expertise to build reliable, scalable systems from code to deployment.

Educational Background

BSc (Hons) Computing **2024-Present**

Islington College

London Metropolitan University

Kamalpokhari, Kathmandu

SLC **2023-2024**

Bluebird College

National Examinations Board

Lalitpur

SEE **2022**

South Zone Secondary School

National Examinations Board

Birgunj, Parsa

Skills

Technical Skills:

Programming Languages: Java, Python, JavaScript, HTML5, CSS

Operating Systems: Linux OS, Windows

Tools and Software: VS Code, Terminal, Antigravity, Cursor, Amazon EC2, Vercel, GitHub, Railway

Framework: React JS, Node JS

Soft Skills:

Communication, Time Management, Interpersonal Skills, Quick Learner, Problem Solving

Projects

Academic Projects:

Expedition77

Java / CSS

A full-stack tour guide booking platform designed to connect tourists with local trekking and hiking guides. Tourists can browse and book curated trek routes, while guides can create profiles, post their own hiking routes, and manage bookings. Includes an admin dashboard for overseeing users, bookings, and contact inquiries.

Mirar: Ecommerce Website

JavaScript / HTML / CSS

A frontend-focused ecommerce website for browsing and purchasing watches. Customers can explore products organized by category, view detailed listings, and complete purchases through a clean, responsive shopping experience.

Personal Projects:

Personal Portfolio

React JS / Tailwind CSS

Personal portfolio website built while learning React JS.

Chatwebsite

TypeScript / HTML / CSS

A self-directed project inspired by Messenger, allowing users to share a local host URL so others can join a room and chat in real time. Built as a hands-on exercise in real-time communication and application architecture, with future plans for authentication and multi-room support.
